RODRICK GULU JONATHAN

IT Graduate | Software Developer | AI Enthusiast

Email: rodrickgulu13@gmail.com | Phone: 0791008970 | GitHub: https://github.com/RodrickGulu

Profile

Recent Bachelor of Science in Information Technology graduate with experience in web development, backend systems, and machine learning. Skilled in building scalable applications using React, Flask, and Spring Boot. Developed a deep learning model for glaucoma detection and other practical systems. Passionate about solving real-world problems through software engineering and AI.

Technical Skills

• Frontend: React, JavaScript, HTML, CSS

• Backend: Flask, Spring Boot

• Programming: Python, Java

• Machine Learning & AI: Deep Learning, Computer Vision

• Tools: Git, GitHub, Wireshark, Cisco Packet Tracer

Projects

Glaucoma Detection System

Developed a deep learning model to detect glaucoma from retinal images. Built using Python and CNN models.

Retinal Image Classifier

Built a classifier to validate whether uploaded images are retinal images before processing.

Portfolio Website

Designed and developed a modern React-based portfolio showcasing projects, skills, and experience.

Experience

ICT Intern – NGAAF Headquarters (2026)

Provided ICT support, system maintenance, and assisted in internal IT operations.

IT Attachment – Kenya National Archives (2022)

Worked on digital records management and documentation systems.

Education

Bachelor of Science in Information Technology – Dedan Kimathi University of Technology (Graduated May 2025)
